Structure [execution order]
root/
   common/
        layouts/
            default.cfm [11]
    subsystem/
        controllers/
            section.cfc
                init(fw) [3] *
                before(rc) [4]
                item(rc) [5]
                after(rc) [6]
    layouts/
        section/
            item.cfm [8]
        section.cfm [9]
        default.cfm [10]
    views/
        section/
            item.**cfm** [7]
    Application.cfc [1] extends the framework.cfc
        setupApplication(), setupSession(), setupRequest(), setupSubsystem()
    index.cfm
    framework/**one.cfc** [2]

action = subsystem:section.item

a lightweight, convention over configuration, MVC application framework for ColdFusion / CFML

* only runs when section.cfc is instantiated

Controller
commonly used functions
variables.fw.populate()
variables.fw.redirect()
variables.fw.renderData()
variables.fw.setView()
variables.fw.customizeViewOrLayoutPath()

View/Layout
commonly used functions   /variables
view()   body
buildURL()   rc[]
layout()   local[]
getBeanFactory()   framework[]
    request.layout

Configuration
```
variables.framework = {
  action = 'action',
  // base = omitted so that the framework calculates a sensible default
  usingSubsystems = false,
  defaultSubsystem = 'home',
  defaultSection = 'main',
  defaultItem = 'default',
  subsystemDelimiter = ':'.
  siteWideLayoutSubsystem = 'common',
  home = 'main.default', // defaultSection & '.' & defaultItem
  // or: defaultSection & subsystemDelimiter & defaultSection & '.' & defaultItem
  error = 'main.error', // defaultSection & '.error'
  // or: defaultSection & subsystemDelimiter & defaultSection & '.error'
  reload = 'reload',
  password = 'true',
  reloadApplicationOnEveryRequest = false,
  preserveKeyURLKey = 'fw1pk',
  maxNumContextsPreserved = 10,
  baseURL = 'useCgiScriptName',
  generateSES = false,
  SESOmitIndex = false,
  applicationKey = 'org.corfield.framework',
  unhandledExtensions = 'cfc',
  unhandledPaths = '/flex2gateway',
  cacheFileExists = false
};
```
